- **General Contractor:** T.N. Ward
- **Architect:** Friedmutter Group
- **Program (Building Type):** Hotels
- **On-site Erection Date:** 2014
- **Panel Type:** StoPanel Classic ci

Project Overview

A convention facility of almost 300,000 costing \$150,000,000. Adjacent to the company's casino property required an exterior wall that would be attractive and cost effective.

Job Requirements

With a challenging, waterfront site, the weight of the building was an important issue for the designers. A short construction schedule was part of the program the owner needed to overcome to make this job possible.

Smart Solution

The use of StoPanel, with its light weight and energy efficient design, offered the owner what they wanted and helped the job to be completed on an abbreviated schedule all while maintaining a tight budget.
